RSMKIT-ColorADAPT® Adaptive RGB LED Weatherproof Motorcycle Kit Install Guide

Check out our You Tube video on the Kit

https://youtu.be/Udf_ZwM_rJs

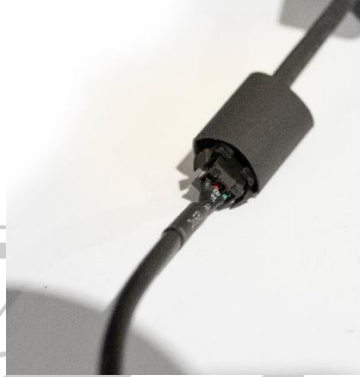

Kit Includes

- **12 Inch (1 foot) QTY 10**
- **8 Inch QTY 8**
- **Y-Splitters QTY 5**
- **48 Inch (4 Feet) QTY 2**
- **4 Inch LED Strips QTY 10**
- **Shrink Wrap Sections**
- **Credit Card Remote**
- **Control Module with Power and Ground Leads with Power Switch.**
- **Alcohol Wipes**
- **Zip Ties**

Step 1- Inspect kit to ensure all contents are included and the kit is fully functional.

Step 2- Decide where to locate the light strips and ensure wiring has enough length for the control box to be installed in desired location. You may not have to use all supplied extensions it all depends on application and vehicle. Use supplied shrink wrap to cover each plug being used.

Step 3- Secure control box in desired location along with supplied switch, run power and ground to battery or desired power supply. ***The control box is NOT waterproof, tuck away from the elements***

Step 4- Clean all locations were the strips will be mounted with the wipes supplied and mount the LED strips with double sided tape and zip-ties supplied. Make sure all wiring away from all moving components.
